

WatermatiX

THE SMARTER WAY TO UTILISE YOUR RAINWATER

Renewable Water Solutions WatermatiX pump systems ensure a seamless switch to mains water whenever your **rainwater tank runs low** or there is a **power black out**. But **YOU** get to choose whether that mains water goes onto your garden.

Your water: your choice.

- High performance Australian-made mains water back up pumps
- Divert to mains water as soon as rainwater runs low or power black outs occur
- Pump controller allows you to check whether you are on rain water or mains water

- NEVER run out of water
- Prevents you from using mains water accidentally for outdoor irrigation*
- Pre-packaged system ensures lower installation costs

*Rain Water Only models optional

WATER SOLUTIONS

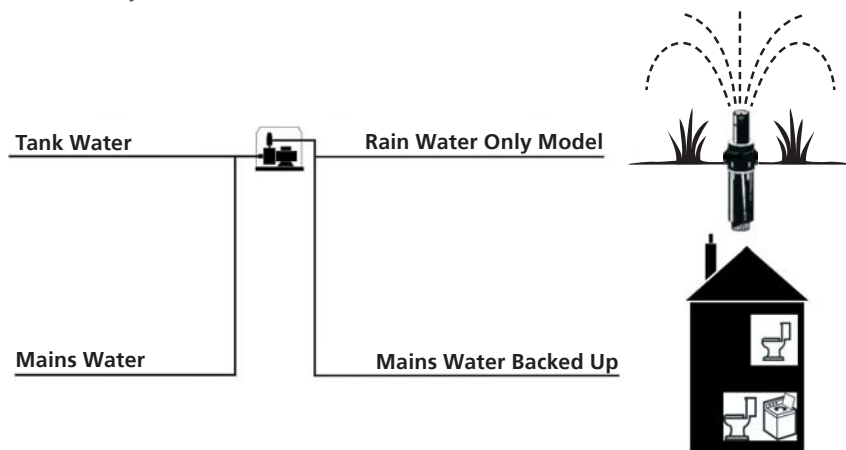

Two system types

Mains Water Back Up with Low Level Cut Out

This WatermatiX model automatically turns off the rainwater tank pump as soon as your tank runs low on water, or if there is a power black out. It diverts to mains water immediately so you don't have to go out and flick any switches or re-prime the pump yourself.

This means no sudden cut outs, no loss of water, and no urgent calls to the plumber to make the switch for you.

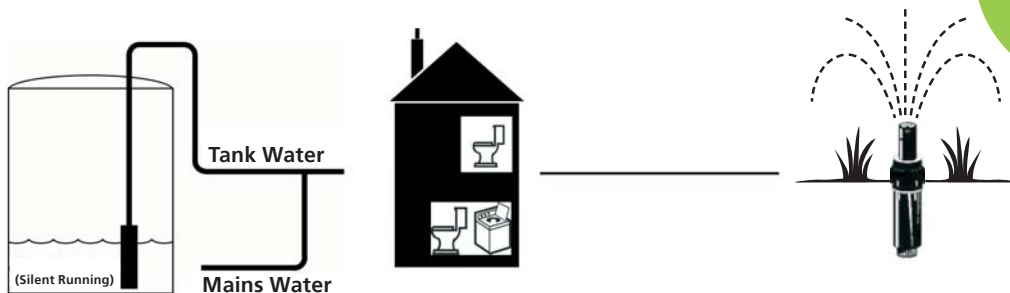

WatermatiX automatically switches back to rainwater as soon as the water level in your tank has recovered – you don't have to do a thing. That's good for you, and great for the environment. And if you choose the Rain Water Only model, it's even better, since it will only allow you to use mains water in your laundry and your toilet, and **won't let you water your garden with mains water, even by accident!**

Submersible Pressure Pump Systems With Mains Water Back Up & Low Level Cut Out

This WatermatiX model does everything the non-submersible model does, except the trigger for automatic diversion to mains water operates underwater. It is a **silently running pressure pump** which registers as soon as the water level drops below a certain point, and switches over to mains water.

The submersible model also comes in a Rain Water Only version.

Call RWS today to find out which system will best suit your needs. And discover how to get the most out of your harvested rainwater.
